

CITYScapes

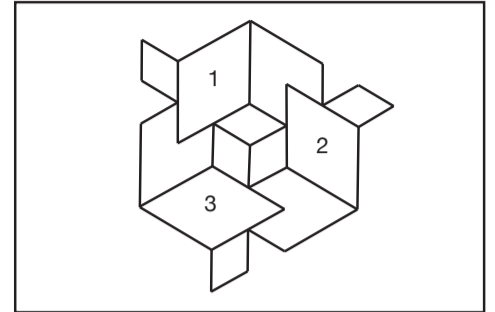

Select 2 tiles.

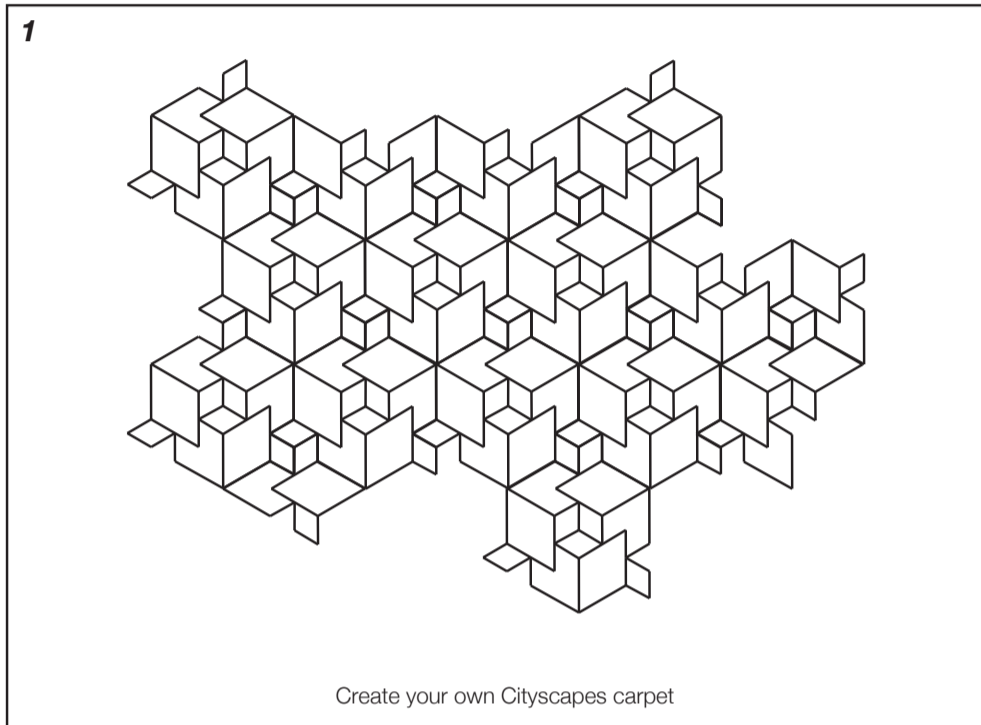

Turn the right tile 180 degrees.

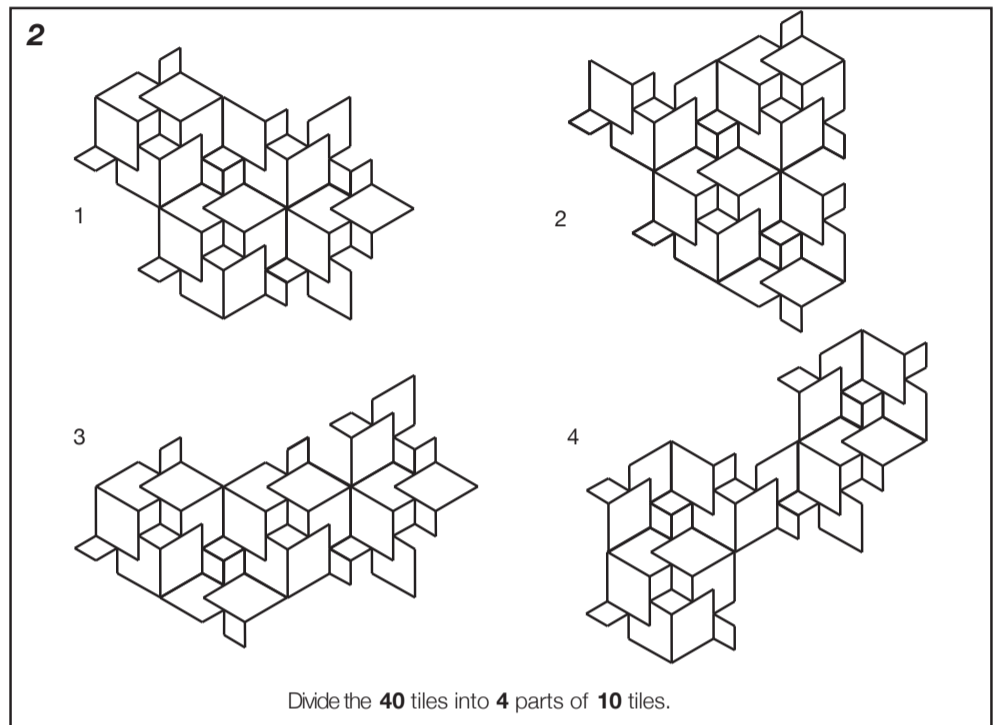

Slide the tiles together.

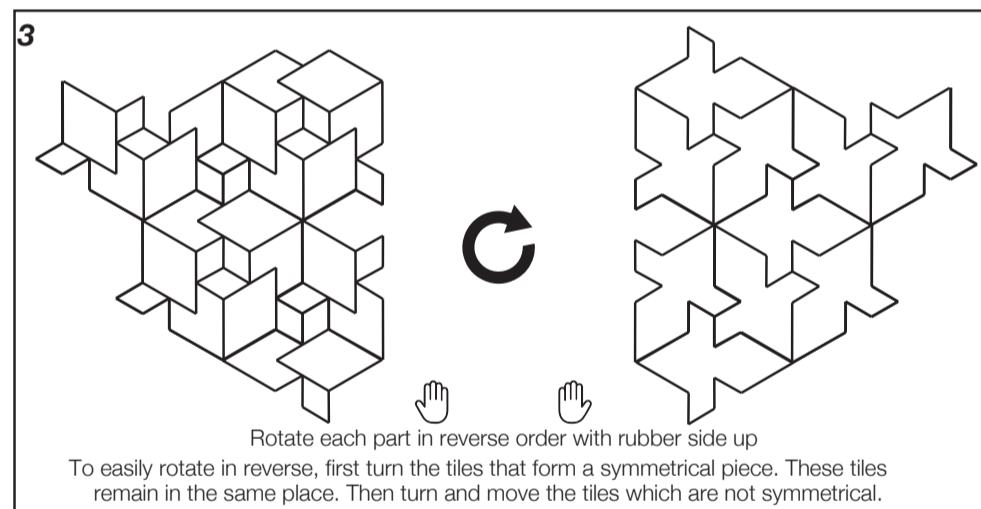

Add a third tile.

Create your own Cityscapes carpet

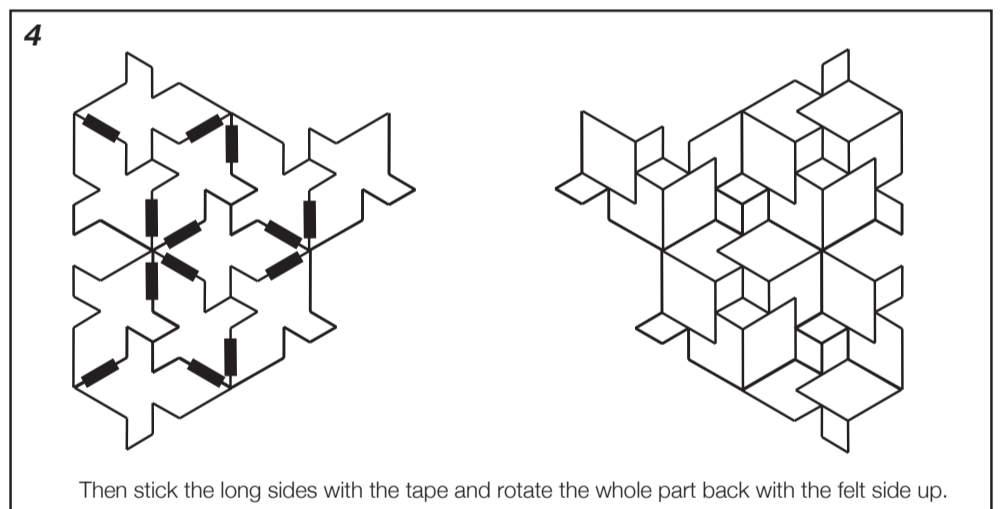

Divide the 40 tiles into 4 parts of 10 tiles.

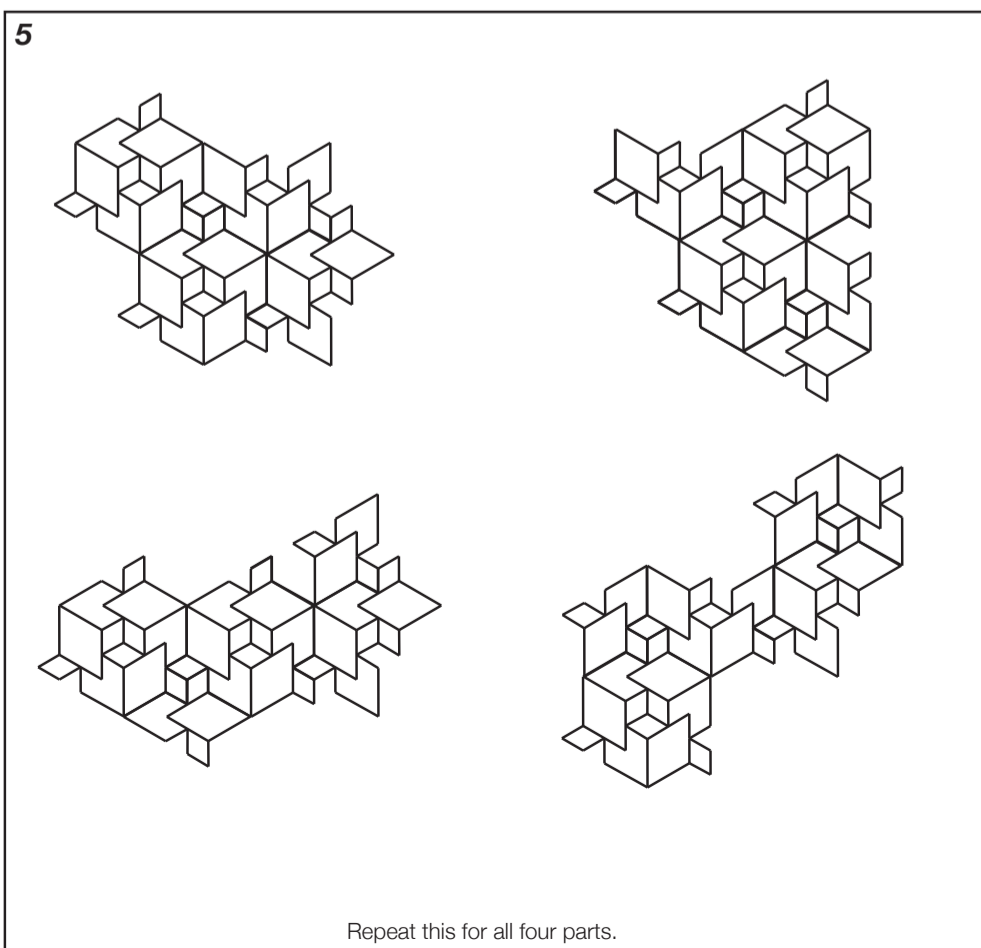

Rotate each part in reverse order with rubber side up

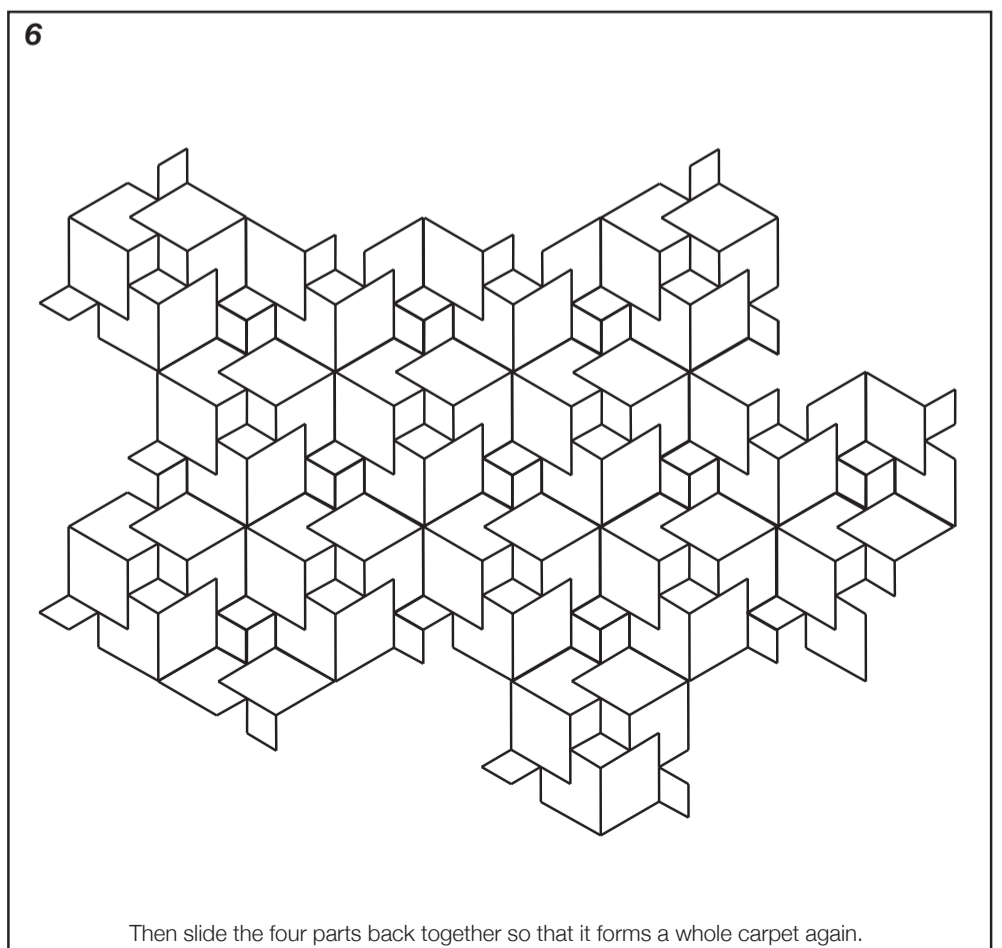

To easily rotate in reverse, first turn the tiles that form a symmetrical piece. These tiles remain in the same place. Then turn and move the tiles which are not symmetrical.

Then stick the long sides with the tape and rotate the whole part back with the felt side up.

Repeat this for all four parts.

Then slide the four parts back together so that it forms a whole carpet again.
